HISTORY

In the late 1930s, our founder's grandfather loads his ships with spices, textiles and machinery, and bags of small green beans that would change the course of his life.

Coffee was then transported and traded throughout the Arabian Gulf. It was served at the ports when you arrived, in people's homes and in their yards, amongst friends and strangers. The scent is familiar and resilient; it endured down through three generations, greeting Emirati Coffee, a local speciality coffee scene and restore the glory of their forefathers.

It's the first of its kind, and ode to a small green bean.

MISSION

It's important to us to forge genuine connections with our suppliers, our customers and our community. We believe in doing our work in a way that is transparent and collaborative. Our thrill lies in the pursuit of mastering the creation of the perfect cup and sharing the knowledge that we've picked up along the way. Our Mission is to make speciality coffee accessible, affordable, and enjoyable for everyone

SOURCING AND SUSTAINABILITY

We believe in direct trade or relationship coffees. We believe in not just purchasing coffee from farmers, but cultivating a friendship that adds value, compassion, and integrity to our business as well as that of the supplier and farmer.

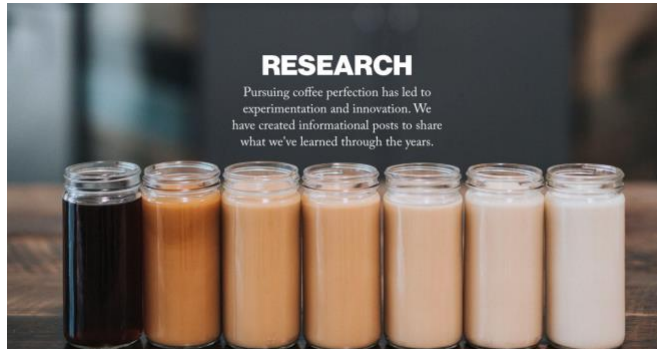

We understand that what makes coffee such a phenomenal beverage is the endless opportunities to discover something new in each cup. That's why when we find coffee that we love we ensure we pay well above Fair Trade Prices to invest in the future of these farms.

Sustainability is at the heart of what we do, and industry education is the future of sustainability. We aim to connect farmers with roasters and baristas and bridge the gap between the start and finish of the coffee chain.
